

Sourcefire® On-Demand Webinar: Reaping the Benefits of IPS and SIEM

Integration

Sourcefire IPS™ is designed to defend your network from today's most sophisticated threats. But a network IPS is just one piece of your organization's IT security puzzle.

With some organizations generating millions or even billions of events per day from best-of-breed endpoint and network security solutions, distilling that data down to priority offenses can be a daunting task.

Cybersecurity experts from Sourcefire and Q1 Labs will show you how to glue all of the pieces of your IT security puzzle together into a single, manageable framework for defending your network and achieving your compliance goals.

In this webinar, you will learn:

- Key benefits of IPS and SIEM integration
- Insights into Sourcefire's eStreamer interface
- How a combined Sourcefire / Q1 Labs solution can work for you

Presenters:

Douglas Hurd, Director of Technical Alliances at Sourcefire

Matt Ward, Sr. Product Manager at Q1 Labs
